Our results define a pathway for LRRK2 secretion in exosomes (Fig. 9). Exosomes may be recruited to MVBs through plasma membrane-derived vesicles enriched in transmembrane plasma proteins such as CD9 in a clathrin-dependent manner, or through the direct uptake of late-endosomal vesicles into MVBs (31). Academic Molecular genetics is a sub-field of biology that addresses how differences in the structures or expression of DNA molecules manifests as variation among organisms. Molecular genetics often applies an "investigative approach" to determine the structure and/or function of genes in an organism's genome using genetic screens. The field of study is based on the merging of several sub-fields in
