revisited - it was more than 50 years after Darwin  
started to develop his theory of evolution before  
biologists could determine how evolution takes place -  
about 1910, biologists realized that genes carry the  
information that determine traits CHAPTER 16

EVOLUTION OF POPULATIONS Chapter 16 Evolution of Populations 16-1 Genes and Variation Darwin's original ideas can now be understood in genetic terms.

Beginning with variation, we now know that traits are controlled by genes and that many genes have at least two forms, or alleles.
