systems. Circulatory System Grade 6 Worksheets - Teacher

Worksheets The circulatory system refers to how our lungs, heart, and veins/arteries/blood vessels work together to move blood around the body. Our blood plays a very important role, as it distributes oxygen, nutrients and hormones to our cells. Our bodies work very hard to keep this up all the time, even when we're sleeping, and this keeps us alive. Blood and the Circulatory System: Differentiated

circulatory system are the heart, arteries, veins and blood. Let's have a closer look at how they operate in the body. The heart is roughly the size of a large fist and is located near the chest's centre. Its job is to pump persistently and to ensure the circulatory system is working all of the time.
