The user permissions feature

lets the administrator configure Cisco TMS to present each user only with the functionality needed for their particular role.

About this guide

This administrator guide contains conceptual information, procedures, and reference information primarily aimed towards Cisco TMS administrators.

Cisco TelePresence Management Suite

Cisco TelePresence Management Suite (Cisco TMS)

enables you to

manage, deploy, and schedule your entire video network, including telepresence, from one platform. Cisco TMS provides visibility and centralized control for on-site and remote video systems, and aims to make tele-presence accessible and successful within an organization. Cisco TelePresence Management Suite When you book from Outlook, the telepresence management backend (Cisco TMS) will automatically add default settings, reserve the necessary infrastructure resources, and route your telepresence meeting. If you are booking WebEx, the WebEx backend will set this up for you according to the default settings. CiscoSystems,Inc. www.cisco.com
