

Cross Connect Solutions Colocation

pdf free cross connect solutions colocation manual pdf
pdf file

Cross Connect Solutions Colocation A cross-connect is a physical, hardwired cable that provides a direct connection between two different termination locations within a data center. Cross connects enable colocation customers to establish high-performance, dedicated connectivity to one another within the data center – providing increased reliability and lower latency over network connections standardly used outside of a data center. Cross Connects | CoreSite Cross Connect Solutions offers datacenter environments to accommodate small, medium or enterprise-class customers who need space for growth and power on-

demand in a high-bandwidth, accessible facility. Cross Connect Solutions provides connection from point A to point B. For example, a data center may offer multiple network providers to clients. This allows businesses to receive the best colocation solutions as carriers compete to offer the greatest required services. Cross Connect Solutions - CyrusOne Cross Connect Solutions Colocation A cross-connect is a physical, hardwired cable that provides a direct connection between two different termination locations within a data center.
