Drilling Engineering Drilling engineering is a subset of petroleum engineering. Drilling engineers design and implement procedures to drill wells as safely and economically as possible. They work closely with the drilling contractor, service contractors, and compliance personnel, as well as with geologists and other technical specialists. The drilling engineer has the responsibility for ensuring that costs are minimized while getting information to evaluate the formations penetrated, protecting the health and safety Drilling engineering - Wikipedia Drilling engineering is a branch of petroleum engineering that deals with drilling

different types of wells to access the reservoir using different techniques. There are several formulas used in drilling engineering in determination of important parameters including but not limited to mud rheology, mud weight, weight on bit, pump rate, as well as the characteristics of rock and drilling fluids.
