Isotonic Solution: This is a solution with the same concentration of water and solutes as inside the cell, resulting the cell retaining its normal shape because there is no net movement of water. To maintain the equilibrium water molecules move in and out of the cell at the same rate. Study 21 Terms | Biology Chapter 7 Section 4

Review ... Note: This section goes into greater detail than is necessary for classes on the level of AP Biology. It does, however, provide further insight into the processes behind cell regulations that AP Biology glosses over. In this section, we will review the biological regulators of the cell cycle. The Cell Cycle: Cell Cycle Regulation | SparkNotes Cell, in biology, the basic membrane-bound unit that contains the fundamental molecules of life and of which all living things are composed. A single cell is often a complete organism in itself, such as a bacterium or yeast. Other cells acquire specialized functions as they mature. cell | Definition, Types, & Functions | Britannica Section 1 The History of Cell Biology Chapter 4 The Cell Theory • The cell theory states that all living organisms are made of one or more cells, cells are the basic units of structure and function, and cells come only from pre-existing cells.
