List. •absolute temperature: This is a temperature reading made relative to absolute zero. We use the unit of Kelvins for these readings. •absolute zero: This is the lowest temperature possible. If you remember that temperature is a measurement of how much atoms move around in a solid, you can guess that they stop moving entirely at absolute zero. Basic Chemistry Vocabulary List - unizg.hr denature- There are two common meanings for this in chemistry. First, it can refer to any process used to make ethanol unfit for consumption (denatured alcohol). Second, denaturing can mean breaking down the three-dimensional structure of a molecule, such as a protein is denatured when exposed to heat. Chemistry Vocabulary -

Introduction To

Chemistry Vocabulary Review Answers 1.1: The Scope of Chemistry Chemistry is the study of matter and the ways in which different forms of matter combine with each other. You study chemistry because it helps you to understand the world around you. Everything you touch or taste or smell is a chemical, and the interactions of these chemicals with each other define our universe.
