Modeling Batch Distillation Utc Engineering Lab Web Modeling of a distillation column is a challenging problem due to its strong interactions inter- components, highly nonlinear physically and complex to control. However, for efficient and effective batch distillation process, one may need to have proper model of the process for control system analysis and design. Modelling of the Mini Batch Distillation Column Reactive batch distillation (RBD) is a preferred process intensification technology to carry out equilibrium-limited reactions. It is a multicomponent, multiphase system. Appropriate process description requires dynamic
