Online browser screen tester, shows the screen resolution of your current monitor, provides screen resolution realtime statistics What is my screen resolution/display resolution? - Screen ... High Screen Resolution Statistics. The tables below are a breakdown of "other high resolutions" from our Browser Display Statistics: High Screen Resolution Statistics - W3Schools Screen Resolution Statistics. As of January 2017, about 95% of our visitors have a screen resolution of 1024x768 pixels or higher: Browser Display Statistics - W3Schools For television standards,

this is typically stated as "lines horizontal resolution, per picture height"; for example, analog NTSC TVs can typically display about 340 lines of "per picture height" horizontal resolution from over-the-air sources, which is equivalent to about 440 total lines of actual picture information from left edge to right edge. Display resolution - Wikipedia Most combinations represent some tiny fraction of the whole. For example, a screen resolution of 1600×900 with a browser size of 1580×810 represent 0.12% of users. And there are thousands of more combinations like it. There are a few at the very top: Google Analytics Can Show You Screen Resolution ≠ Browser ... unfortunately all the answers so

far are giving SCREEN resolution and not the requested BROWSER display/resolution. They are two different entities. Not everyone has their browser open to 1920x1080 on their 1920x1080 monitor. There are no actual statistics (that I can find) on BROWSER display size. General Browser display statistics - Stack Overflow Screen resolution is the number of pixels a screen can show, both horizontally and vertically. So, a screen that has a resolution of 1920 x 1080 (a popular resolution that's also known as 1080p or Full HD), can display 1,080 pixels vertically, and 1,920 pixels horizontally. Screen resolution: The ultimate guide | Creative Bloq The resolution you can use depends on the resolutions your monitor supports. CRT

monitors generally display a resolution of 800 × 600 or 1024 × 768 pixels and can work well at different resolutions. LCD monitors, also called flat-panel displays, and laptop screens often support higher resolutions and work best at a specific resolution. Change your screen resolution - Windows Help Being the geek I am I get carried away with statistics regarding the audience devices I'll need to develop for, coming from an art(ish) background means that this is doubly important for me. While looking for some detailed metrics on this I came across this page on the W3C site which links to Screen resolution statistics — Arcus Global There's no one best screen size to design for. Websites should transform responsively and

fast at all screen resolutions on different browsers and platforms. Accessible. Mobile-friendly. Design for your audience, first. Design from 360x640 through 1920x1080.
