Similar Triangles - CliffsNotes Study Guides Similar Triangles. Two triangles are Similar if the only difference is size (and possibly the need to turn or flip one around). These triangles are all similar: (Equal angles have been marked with the same number of arcs) Some of them have different sizes and some of them have been turned or flipped. For similar triangles: Similar Triangles - MATH Kind of like similar polygons, and of special significance to us, similar triangles. Similar triangles (or polygons) are those that look exactly like each other in every way except for their size, the same way that over-sized babies look exactly like regular-sized babies, only much, much bigger. Of course, over-sized babies have much, much bigger diapers as well, and we don't even want to imagine how you'd go about changing them.
