## Solutions Chemical

Thermodynamics The primary objective of chemical thermodynamics is the establishment of a criterion for determination of the feasibility or spontaneity of a given transformation. In this manner, chemical thermodynamics is typically used to predict the energy exchanges that occur in the following processes: Chemical reactions; Phase changes; The formation of solutions

Chemical thermodynamics - Wikipedia This chapter describes common types of solutions and examines the thermodynamic properties of solutions, begins with gas mixtures then extending the concepts to

liquid and solid solutions, both ideal and non-ideal. The composition of solutions is expressed in terms of the concentrations of the components forming the solution.
