[EPUB] dynamically filter subsets of Grid Data and display filtered data results in 2D stereonet plots, 3D stereonet plots, and charts. Data filters can be applied independently in each open view for easy side-by-side comparisons. Quickly toggle between filters in each active view to perform analysis on unfiltered or filtered data sets and view the Dips - Rocscience Inc. The

analysis is highly interactive – you can change the input parameters and the stereonet view and analysis results are updated immediately on the screen. You can quickly perform a sensitivity analysis by varying input parameters and exporting results. Kinematic Analysis of wedge sliding Kinematic Analysis of flexural toppling Kinematic Analysis - Rocscience Inc. The Contour Plot clearly shows the data concentrations. It can be seen that there are three data clusters in the EXAMPLE.DIP file, including one that wraps around to the opposite side of the stereonet. Since this file only contains 40 data entries, the data clustering in this case was apparent even on the Pole Plot. However, in larger DIPS ... Dips - Rocscience Inc. Stereographic

projection involves plotting 3D data (planar or linear) on to a 2D surface (stereonet) where it can be manipulated and interpreted. Imagine a sphere with lines of latitude and longitude marked on it. A stereonet is the plane of projection of the lower half of this sphere – it is a lower hemisphere graph. Introduction to Structural Geology of stereonets in structural analysis It is helpful to understand the 3-D geometry that is being represented on the 2-D stereonet projection plane. The diagrams below attempt to show you that geometry in three stages, each more complex. It may take some time and focus to understand the geometry. Lab 5: Structural Analysis using stereonets Rocscience provides industry-

Stereonet - Visible Geology - YouTube Stereonets Stereonets are useful for visualising structural data and identifying trends in 2D. Errors in categorisation of structural data can also become apparent when the data is viewed on a stereonet. This topic describes how to work with stereonets in Leapfrog Geo. Stereonets - Leapfrog When a slope in question is at risk for rockfall, Rocscience's 2D statistical analysis program RocFall can assist with their assessment. It performs numerical simulations that predict falling rocks' trajectories so

that the risk areas can be identified and proper remedial measures put in place. Rocscience - Association of Geohazard Professionals - AGHP Open Software link Dips is designed for the interactive analysis of orientation based geological data.
