Template - Free Download Purpose  
The results of the system design  
process are recorded in the System  
Design Document (SDD). This  
document completely describes the  
system at the architecture level,  
including subsystems and their  
services, hardware mapping, data

Template

management, access control, global software control structure, and boundary conditions. System Design Document Template The System Design Document (SDD) describes how the functional and nonfunctional requirements recorded in the Requirements Document, the preliminary user-oriented functional design recorded in the High Level Technical Design Concept/Alternatives document, and the preliminary data design documented in the Logical Data Model (LDM) transform into more technical system design specifications from which the system is built. The SDD documents the high-level system design and the low-level detailed ... System Design Document Template - CMS This System Design Document
