... Everettian Universe: "The Orthogonal Trilogy" by Greg Egan This very hard, hard SF Trilogy is perhaps the ultimate in hard SF world-building: starting by simply changing a minus sign to a plus sign in the Minkovsky equation that governs the geometry of spacetime, Egan then derived, from first principles, how light, matter, energy, motion, gravity and time would work in this Universe (MWI at play here). The Orthogonal Trilogy (Orthogonal #1-3) by Greg Egan The Clockwork Rocket [Orthogonal Book One] (2011) Egan's "Orthogonal Trilogy" explains how the Peerless and its crew of scientists, mathematicians and engineers was launched in the hope if find a way to save their homeworld from destruction. A major focus

is on the way physics and biology would be different in a universe where the laws of physics were different. MathFiction: The Clockwork Rocket [Orthogonal Book One ... Orthogonal is a science fiction trilogy by Australian author Greg Egan taking place in a universe where, rather than three dimensions of space and one of time, there are four fundamentally identical dimensions. While the characters in the novels always perceive three of the dimensions as space and one as time, this classification depends entirely on their state of motion,

and the dimension that one observer considers to be time can be seen as a purely spatial dimension by another observer. Orthogonal (series) -

Egan's new novel The Clockwork Rocket follows very much the same template as Incandescence: on an alien world, a young person studies basic physics, and in doing so uncovers a threat of catastrophic proportions. Only by the concerted and co-operative effort of the whole civilisation can the catastrophe be averted—though we don't find out if the effort succeeds, as there are still two volumes of the 'Orthogonal' trilogy to follow.
