Titanium Mobile Appcelerator
Titanium is a free and open source
application development platform
that lets you create cross platform
native mobile applications using
existing Javascript skills. In this

Documentation

section, you will examine the Titanium architecture to better understand how you can use it to build native mobile apps. [Titanium Platform Overview - Documentation ... - Appcelerator](#) The Titanium SDK helps you to build native cross-platform mobile application using JavaScript and the Titanium API, which abstracts the native APIs of the mobile platforms. Titanium empowers you to create immersive, full-featured applications, featuring over 80% code reuse across mobile apps. [Titanium SDK - Documentation & Guides - 2.0 - Appcelerator ...](#) To create your first Titanium app, please review [Hello Titanium App Tutorial](#). [Troubleshooting](#). If you are experiencing problems after following these setup instructions,

Documentation

please follow the more detailed Setting up Studio guide. Next steps. You can learn more about Titanium by opening the Studio Dashboard, then. Watching the Appcelerator ... Titanium SDK Getting Started - Documentation & Guides - 2 ... The Titanium CLI generates one module project for multiple platforms. The module project contains platform-specific resource folders, called android and iphone, as well as common resources for assets, documentation and examples. Since packaged modules can contain native code, a module can generally do anything that native code can do. Titanium Module Concepts - Documentation ... - Appcelerator Welcome to the Appcelerator Platform! The Axway Appcelerator Mobile Solution
