regional and international experience. We are only too happy to help as we work with your project team. Our goal is to add value as we ensure an innovative system is designed with reduced capital cost and increased operational efficiency. We are engineers who focus on engineering. Water Design Engineers - Features, Pools & Treatment Systems Engineering & Design We strive to share and deliver critical knowledge that provides our clients with innovative treatment solutions. Advanced Waste & Water Technology's scientists and technicians have designed wastewater treatment units ranging in size from 3 gallons per minute (GPM) to more than 500 gallons per minute (GPM). Advanced Waste Water Treatment, Corp The Water and Wastewater Engineering course is ideal for individuals who want to make a real difference to delivering reliable water supplies, or to maintaining and enhancing river and ground water quality. Well-educated, skilled and experienced graduates are required to design, operate and manage vital water and wastewater treatment services. Water and Wastewater Engineering MSc With population growth and climate change risk, the design and management of water infrastructure is becoming more complex. With oversight, we can better look ahead, whether helping manufacturers such as Diageo secure their future water supply or advising environment agencies on
