Electric Fires, Stoves & Inset Fires from Solution Fires

The concentration of a solution is the proportion of the solute to solvent. If there is a lot of solute in a solution, then it is "concentrated". If there is a low amount of solute, then the solution is said to be "diluted." Miscible and

immiscible When two liquids can be mixed to form a solution they are called "miscible." Chemistry for Kids: Solutions and Dissolving In chemistry, a solution is a special type of homogeneous mixture composed of two or more substances. In such a mixture, a solute is a substance dissolved in another substance, known as a solvent. The mixing process of a solution happens at a scale where the effects of chemical polarity are involved, resulting in interactions that are specific to solvation. Solution - Wikipedia The equations section lets you solve an equation or system of equations. You can usually find the exact answer or, if necessary, a numerical answer to almost any accuracy you require. The inequalities section lets you solve an inequality or

a system of inequalities for a single variable. You can also plot inequalities in two variables.
