Winterizing Mercury Inboard Engine Winterizing your Mercruiser 3.0. Winterize your lower end and motor. You could do this on a 5.7, 4.3, 4.0, and of course a 3.0 Mercury boat. Make sure you drain all the water out. How To Winterize a Boat - Mercruiser 3.0 , 5.7 , 4.3 , 4.0 ... Follow the directions for winterization and fuel stabilization in your engine owner's manual. Some people prefer to "fog" the engine. With the engine running at a high idle (with a water hose hooked up for cooling of course), slowly pour a quart of Marvel Mystery Oil down the throat of the carburetor. How to Winterize Your Mercruiser (with Pictures) -

wikiHow Before putting your boat away for the winter, you must first winterize the motor. Your Mercruiser 3.0 uses the water in the lake to cool the engine while boating. This water stays inside the engine. Failure to remove the water will cause freezing. As the water freezes, it expands. This will cause the engine block to crack. How to Winterize a Mercruiser 3.0 | It Still Runs How to winterize a boat. 4.3 Mercruiser Alpha One. The same can be done on a 3.0, 4.0, 4.3, 5.0 and 5.7. I winterize this inboard by pouring coolant in the motor and checking the lower end fluid. 5... How to Winterize a 4.3 Mercruiser - YouTube Winterizing a 3.0l 4cyl mercruiser inboard engine. In Canada, it is very important to properly winterize marine equipment.

Particularly inboard engines. If an engine is left full of water, and it freezes it will crack the block. an engine with a cracked block will need to be rebuilt, or replaced, and can cost upwards of \$10,000.00. Winterizing a 3.0L Mercruiser 4 Cylinder - Dars small ... You must winterize your MerCruiser 4.3L V6 before storing it. The engine sucks water up from the lake through the impeller to cool the engine. This water does not automatically drain out of the engine. Because water expands when it freezes, it's imperative to drain the water from the engine. The carburetor also needs special attention. How to Winterize the MerCruiser 4.3L V6 | It Still Runs Adding Antifreeze and Fogging Oil to an Inboard engine. The procedure is a

little different for an inboard power plant. Warm the engine up to operating temperature, just like with a sterndrive. Instead of using a winterizing kit, you'll need a five-gallon bucket, and enough antifreeze for your engine and related plumbing (at least two gallons). Winterizing your Gas Inboard or Sterndrive | West Marine Once the engine is warmed up turn off, hook up the rig, start engine and dump the four gallons of RV antifreeze into the rigs jug. This will circulate the antifreeze through the system. I havent had issues but know you do at your own risk. Other than that, cleaning boat and spray down engine with WD40. Winterizing your Mercruiser Page: 1 - iboats Boating ... Manufacturers of outboard motors and MerCruiser

inboard engines, with over 4000 dealers in the United States. Storage and Winterization | Mercury Marine If you've got an inboard or a sterndrive (inboard/outboard) boat motor, then winterizing is an absolute must-do. This process prevents gunk from building up, keeps condensation out of the fuel tank and just overall keeps your engine healthy. I've already covered winterizing pontoon boats, which usually have outboard motors. How to Fully Winterize Inboard Boat Motors in 4 Steps ... By following your manufacturer's directions to winterizing your boat's engine, you are ensuring the best possible performance from your boat's propulsion system. Next, winterize the hull and interior of the boat so when spring arrives, you can be

confident that the steps you took in the fall will mean less hassle before getting out on the water again in the spring. HOW TO WINTERIZE YOUR INBOARD MARINE ENGINE FOR WINTER ... For full extended winter storage, after completely draining the cooling system, Mercury MerCruiser recommends the use of propylene glycol antifreeze (with a rust inhibitor for marine engines) in the sea water section of the cooling system. Mercruiser Engine-Winterize Your Mercruiser Engine Add fuel stabilizer to the tank and run the engine so the treatment circulates. Shut it off and let it cool. Next, "fog" the engine from a six-gallon remote tank. Add five gallons of gas, two quarts of TC-W3 two-stroke oil and five ounces of fuel stabilizer. Winterizing

Freshwater-Cooled Engines | Boating Magazine There are two methods of winterizing a raw-water-cooled engine or the raw-water side of a freshwater-cooled engine: draining the system and leaving it dry, or filling it with winterizing antifreeze (propylene glycol). The preferred technique for inboard engines, circulating antifreeze throughout the cooling system, is better for an engine. Winterizing Boat Engines And Drives - The Boater's Guide ...
